Art Unit: 3654

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). It is unclear as to how the applicant is considering the apparatus as including “means for selectively extending the conveying unit” as well as having “means for moving” the insertion device. This language does not appear in the specification. Appropriate correction is required. No new matter may be entered.

2. The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which applicant regards as his invention.

3. Claims 19-22 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. In claim 19, it is unclear as to how the applicant is considering the apparatus as including “means for selectively extending the conveying unit” as well as having “means for moving” the insertion device. These appear to be the same means.

b. In claim 22, it is unclear as to how the applicant is considering the apparatus as including supporting rollers as well as the “means for supporting the insertion device” as recited in claim 19. These appear to be the same means.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 10 and 16-22, as best understood, are rejected under 35 U.S.C. § 102(b) as being anticipated by Gebbardt. Gebbardt shows an apparatus for at least one of loading and unloading goods units to and from a transport compartment (vehicle 10), comprising:

at least one conveying unit (conveyor belt 3) to be installed in a loading area, the conveying unit (3) simultaneously conveying the goods units and having at least one insertion device (the portion of traveling unit 1 underlying and supporting the conveyor belt 3) adapted to be inserted into the transport compartment (10), the conveying unit (3) being movable in a direction toward the transport compartment (10) when conveying the goods units into the transport compartment and being movable in a direction away from the transport compartment to effect off loading of the goods units into the transport compartment, the insertion device forming an area on which the goods units are to be placed and the insertion device (1) being movable in a direction toward the transport compartment (10) contemporaneously with the movement of the conveying unit (3) in a direction away from the transport compartment (see column 2, lines 35-40), whereupon the insertion device (1) discharges from the

Art Unit: 3654

conveying unit (3) the goods units that have been conveyed into the transport compartment (10).

Gebbardt has a lifting unit (5) to raise and lower the upper moving portion of the insertion device (1) in the loading area, as recited in claims 2, 10 and 21. Rollers (6) support the insertion device (1), as recited in claim 3, 19 and 22. The method of use is as recited in claims 17 and 18. Operating the insertion device to move the conveyor when the conveyor is not loading or unloading, would have the insertion speed greater than conveying speed, as claim 20 is best understood.

6. Applicant's remarks in the amendment filed November 25, 2005, have been fully considered, but are deemed moot in view of the above new rejections. The amendment necessitated the new grounds, accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
